# **WATER RATES**

# REVISIONS TO DISTRICT WATER RATES

To: Water Bureau for consideration November 18, 2019

The 2020 budget in support of Water Operations calls for the water use rate to increase to \$4.01 per hundred cubic feet (CCF). The changes will become effective January 1, 2020.

A discussion of several rates that comprise the proposed schedule for 2020 and the recommendations pertaining to each follows:

## **Water Used Charge – Treated Water**

Staff recommends that the rate charged for the use of treated water based on actual metered consumption increase from \$3.50 per CCF to \$4.01 per CCF.

<b><u>CURRENT RATE</u></b>	<b><u>PROPOSED RATE</u></b>
\$3.50/100 Cu. ft.	\$4.01/100 Cu ft.

Staff also recommends approval of the mandated State of Connecticut Department of Public Health primacy fee of \$0.15 per month charged to each customer be identified as a separate line item on customer bills.

## **Customer Service Charge**

Revenues from this customer service charge are intended to support a portion of the fixed operating, maintenance and debt costs associated with water operations. There are no proposed changes to the Customer Service Charge for 2020. The customer service charges in the residential category (5/8", 3/4", and 1" meters) will remain at \$44.94 per quarter. The customer service charges for the 6" will remain at \$1,458.21 per quarter. The customer service charges for the 1 1/2", 2", 3", 4", 8", 10" and 12" meters will remain at \$145.80, \$233.40, \$437.67, \$730.65, \$2,313.48, \$5,333.31, \$5,689.14 per quarter respectively.

## **Surcharge Outside The Metropolitan District**

A fixed "surcharge" rate is added to all accounts for service outside the boundaries of the District. The surcharge is based on the size of the meter that serves each delivery point. Revenues from this charge are for the reimbursement of assets deployed. The surcharge rates have been set at the same rates as the Customer Service Charges. There are no proposed changes to the surcharge for 2020. The surcharge rates in the residential category (5/8", 3/4", and 1" meters) will remain at \$44.94 per quarter. The customer service charges for the 6" will remain at \$1,458.21 per quarter. The customer service charges for the 1 1/2", 2", 3", 4", 8", 10" and 12" meters will remain at \$145.80, \$233.40, \$437.67, \$730.65, \$2,313.48, \$5,333.31, \$5,689.14 per quarter respectively.

## **Water Used Charge – Untreated Water**

The District provides untreated water to other agencies and water companies for a fixed rate based on actual consumption. The current rate for this untreated or "raw" water is \$1.50 per hundred cubic feet of consumption. It is recommended that the charge for untreated water remain at the rate of \$1.50 per hundred cubic feet.

## **Surcharge Outside the Metropolitan District for Capital Improvements**

A surcharge is added to the water rate to recover the cost of major capital improvements and/or upgrades such as water main extensions, pump stations, etc. in non-member towns. The surcharge is calculated based on the percentage of hydraulic capacity of each meter size in each non-member town.

## **Private Fire Protection Charge**

Rates for private fire protection are charged to all fire service accounts, including combination services, based on the size of the service connection. Staff recommends monthly service charges for the 1", 2", 3", 4", 6", 8", 10" and 12" & Larger meters rates increase to \$5.00, \$22.85, \$29.74, \$44.64, \$74.80, \$240.00, \$375.00, \$540.00 respectively.

## **Conclusion**

Staff believes that the foregoing rate change recommendations are justified, reflect the sound financial administration that has earned the District support among credit rating agencies and financial advisors, and are consistent with the policy direction of the Commission.

After reviewing the information contained herein

It is **RECOMMENDED** that it be

**Voted:** That the Water Bureau, acting under Section 5-4 of the District Charter, establishes revised water rates effective with the meter readings rendered on and after January 1, 2020, as set forth in the following "REVISIONS TO WATER SUPPLY ORDINANCES."

### **Further**

**Voted:** That the following rates shall be charged to all customers and appear as a separate line item on customer bills:

1. State of Connecticut Department of Public Health primacy fee of \$0.15 per month

### **Further**

**Voted:** That following the public hearing held on November 13, 2019, as required by Special Act 01-3, as adopted by the General Assembly of the State of Connecticut, and Section 2-14 of the Charter of The Metropolitan District, the Water Bureau recommends to the District Board, through the Committee on MDC Government, approval of the following "REVISIONS TO WATER SUPPLY ORDINANCES" by the enactment of said proposed ordinances. In accordance with Section S12j of the District's Ordinances, sewer use unit charge rates shall be determined annually in conjunction with adoption of the District Budget. The 2020 budget in support of sewer operations calls for a sewer user charge rate of \$5.15, which is 11.0% higher than the prior year.

Additionally, in support of the 2020 budget and in accordance with Section S12l of the District's Ordinances, the monthly sewer customer service charge will increase to \$7.00, effective January 1, 2020.

There will be an Administrative Review Fee for work performed by the Utility Services department, Engineering, Real Estate, Environment, Health & Safety, and others related to customer requests. The Administrative Review Fee includes, but is not limited to, the following individual services: availability and capacity analysis, assessment calculation, permit applications for non-domestic sewage wastewater discharges (including, but not limited to, individual permits, Significant Industrial Users, Categorical Industrial User Wastewater to a POTW, Food Service Establishment Wastewater, Groundwater Remediation Wastewater, Miscellaneous Discharges of Sewer Compatible (MISC) Wastewater, Vehicle Maintenance Wastewater), encroachment permits, abandonment of infrastructure, Engineering/Environmental surveys and documentation requests.

There will be an Annual Wastewater Discharge Compliance Fee for all permitted wastewater discharges categorized as non-domestic sewage discharges, including but limited to, individual permits, Significant Industrial Users, Categorical Industrial User Wastewater to a POTW, Food Service Establishment Wastewater, Groundwater Remediation Wastewater, Miscellaneous Discharges of Sewer Compatible (MISC) Wastewater, Vehicle Maintenance Wastewater. The charge is related costs associated with annual administration and review of discharge monitoring reports, verification of discharges and inventorying and management of customer data.

Following the cost trends for the sewer user charge rate, it is recommended the BOD and COD rate be increased to \$0.61 and \$0.61 per pound respectively. In addition, the suspended solids strength charge will increase to \$0.50 per pound. These unit charges, which apply to high flow users, low flow/high strength users and non-municipal tax-exempt users, are for the following:

1. Liquid flow charge rate based on sewer flow in hundreds of cubic feet (CCF).
2. BOD (biochemical oxygen demand) strength charge rate based on pounds of BOD for the concentration of BOD exceeding 300 milligrams per liter (mg/l); AND/OR COD (chemical oxygen demand) strength charge rate based on pounds of COD for that concentration of COD exceeding 700 mg/l.
3. Suspended solids strength charge rate based on pounds of suspended solids for that concentration exceeding 300 mg/l.

In accordance with Section S12p of the District's Ordinances, sewer user charge Late Filing/Sewage Evaluation Fees will remain at \$250.00 for the 2020 budget.

The clean water project charge is set annually in conjunction with adoption of the District Budget. Effective January 1, 2020, said charge shall be \$4.10 per hundred cubic feet (ccf) to be uniformly applied and to be proportional to the quantity of water used by District customers who utilize the District sewer system and are furnished water directly by the Metropolitan District. The clean water project charge shall appear separately on the water bills of the District.

Liquid Waste Discharge Fee (other than Acceptable Septage): A fee is required as part of the approval from MDC for its acceptance, by whatever means, of the discharge of liquid waste other than Acceptable Septage, as provided by §S13b of the District's Sewer Ordinances. For example, but without limiting the forms of liquid waste subject to this fee, this fee shall apply to the following without limitation: groundwater; remediated groundwater; contaminated stormwater; contaminated groundwater permitted through a CT DEEP Groundwater Remediation General Permit or other CT DEEP Miscellaneous General or Individual Permit; landfill leachate; process equipment condensate; groundwater used for process water including cooling water; discharges granted temporary authorization to discharge by CT DEEP; and stormwater discharged into a separated sanitary sewer system.

Tier 1--	0-500,000 avg. gallons per month	\$0.13/gal
Tier 2--	500,001 to 700,000 avg. gallons per month	\$0.07/gal

## SEC. W1a WATER USED CHARGE (TREATED WATER)

The WATER USED CHARGE is the quantity of water used as read at the meter, as follows:

### BILLS RENDERED

### RATE

MONTHLY

~~\$3.50~~ \$4.01 per 100 Cubic Feet

## SEC. W1f SURCHARGE OUTSIDE THE METROPOLITAN DISTRICT FOR CAPITAL IMPROVEMENTS

In towns outside the limits of The Metropolitan District for which capital improvements or layout and assessment projects are constructed, in addition to charges under SEC. W1a, W1b and W1c, there shall be a surcharge on the water rates determined from the size of the meter installed on the premises, as follows:

In towns outside the limits of The Metropolitan District for which capital improvements or layout and assessment projects are constructed, in addition to the charges set forth in SEC. W1a, W1b and W1c, there shall be a surcharge on the water rates as follows:

1. On or before the end of each fiscal year, The Metropolitan District shall determine the actual cost of each capital improvement constructed for each non-member town and the net cost (cost less assessments) of layout and assessment projects constructed for each non-member town. The costs and/or net costs, as applicable, shall be allocated to the towns for which the work was performed and shall be a surcharge on the water rates of the users located in such towns.

2. The annual surcharge to be added to each user's water rate shall equal the total amount of the costs and/or net costs, as applicable, allocated to the town in which such user is located [excluding costs which the town has paid as set forth in Section W1f(3)] amortized over a twenty year period using an interest rate computed by the District which approximates the District's long-term cost of funds for its General Obligation Bond portfolio with compounded interest at the per annum rate The Metropolitan District would receive from long term investments such as thirty (30) year T-Bills at the time of the expenditure divided by the number of users multiplied by the percentage of hydraulic capacity of each user's meter size (based on the American Water Works Association meter size capacity) of the aggregate hydraulic capacity of all meters in such town. The surcharge shall be billed in either quarterly or monthly installments, as applicable, commencing with the first bill sent out in the fiscal year succeeding the fiscal year in which the work was performed and continuing over the twenty year period.

3. The District shall, as soon as possible after the completion of each capital improvement project or separate phase thereof, provide to the non-member towns for which a capital improvement was constructed a compilation of the costs associated with the construction of such project(s). If, on or before the end of the District's fiscal year in which such construction was completed, a non-member town agrees to pay and does in fact pay all or a portion of the cost of a capital improvement constructed for such town, then the amount paid by such town shall be deducted from the total amount of costs and/or net costs allocated to such town as described in Section W1f(1) and used to calculate the individual surcharges as set forth in Section W1f(2).

Old service pipes that break between the main and street line shall be repaired or replaced by the District at no charge to the property owner. Old service pipes that are inadequate due to corrosion and clogging shall be replaced or relined by the District between the main and street line, at no charge to the property owner, provided the property owner has already renewed his service from the street line to the building, and the District determines, through flow tests or other means, that the service is still inadequate. **SEC. S3d MATERIALS AND WORKMANSHIP FOR SEWERS, DRAINS, CONNECTIONS, ETC.**

The Manager of the Bureau of Public Works shall from time to time establish standard requirements or specifications to regulate the sizes, materials, methods and workmanship to be used in the construction or rehabilitation (e.g. lining) of sewers, drains, house connections and other similar work and appurtenances thereto connected or intended to be connected or to discharge, directly

or indirectly, to any public sewer or drain of the District. Such standard requirements shall provide minimum requirements as to size, depth, slope or rate of grade for such pipes, shall regulate the kinds of pipe, fittings, methods of laying, methods and materials of lining, jointing, materials used, manner of connecting to pre-existing sewers and drains, and general considerations as to location and other pertinent features. So far as practicable, the standard requirements as established by said Manager under this section are contained within the District's Standard Project Manual and shall apply throughout said District insofar as each particular requirement shall be applicable to each location and condition. ~~Until such time as the Manager or Chief Engineer shall have established other standards for work and materials on such sewers, drains, connections thereto and appurtenances thereto, the practices and customary requirements of the Bureau of Public Works with respect to such matters shall control as those practices and requirements were observed and followed prior to the enactment of this ordinance.~~

#### SEC. S3i SPECIFICATIONS FOR LAYING

House connections and drain pipe, except as specially permitted otherwise by said Manager or Chief Engineer, shall be laid to a true rate of grade of not less than one foot per hundred feet and more if possible; shall have not less than three feet of cover at all points; shall be laid on firm, undisturbed soil or suitable foundation; shall be located at a sufficient distance from other parallel pipes to admit of altering or making repair to either line without disturbing the other; shall be well and tightly jointed and well cleaned inside after laying; shall consist of such straight pipe, bends, branches and other fittings as may be needed; and shall conform to all reasonable requirements for good construction. When any property owner seeks and receives an exception to the above specification for the true rate of grade from the Manager or Chief Engineer, the property owner, and its successors and assigns, shall be solely responsible for all maintenance and repair of the entire length of the house connection or drain pipe, including the portion from the property line to the main in the street. Pipe larger than the minimum size specified herein shall be used when and as the size of the structure, the areas of roofs and yards, numbers and kinds of fixtures to be drained and other conditions may make it necessary to provide proper drainage.

#### SEC. S3k ENGINEER SHALL SUPERVISE AND INSPECT DRAIN WORK

All connections to public sewers or drains and appurtenances thereto, all repairs and alterations, including lining, to such sewers or to drains which are connected to or discharge, directly or indirectly, into such sewers or drains of the District or are intended to connect to or discharge, directly or indirectly, into such sewers or drains, shall be made under the supervision and inspection of representatives of or inspectors assigned to such work by the Chief Engineer. Said Chief Engineer shall assign from time to time competent inspectors or engineers to inspect and oversee such work. The services of such inspectors or engineers shall, in general, be available, if needed, between the hours of 8:30 A.M. and 4:00 P.M. on regular working days, Monday to Friday inclusive, provided two hours' notice of the need for such services is given to the office of said Engineer. (See Section S3o).

#### SEC. S3s MAINTENANCE OF SEWER CONNECTIONS

All sewer house connections on private property shall be maintained by, and at the expense of, the property owner, subject to Section S3i. When a sewer house connection is in need of replacement or lining, or for a new house connection to the District's sewer, the property owner may at his or her election, request to participate in the District's sewer installation

program as established by the Bureau of Public Works, as may be modified or amended from time to time. The sewer installation program provides property owners with the ability to pay for house connection replacement, lining or installation over time as part of their monthly water bill.

#### SEC. S3t SEWER STOPPAGES

In the event of complaint regarding a sewer stoppage, the District will ascertain if the main sewer is clear, and any stoppages therein will be relieved as quickly as possible.

If the main (public) sewer is found by the District to be clear, the Owner will be so informed and ~~he~~(the Owner) shall then, at his/her own expense, employ a licensed plumber, reputable cleaner or licensed drain layer to clear any stoppage in the sewer house connection.

If the licensed plumber, licensed drain layer or reputable sewer cleaner finds that the stoppage is within the sewer house connection located within the public street, and that the stoppage cannot be cleared by power rodding or snaking, the licensed plumber, licensed drain layer or reputable sewer cleaner shall inform the District.

If upon investigation by the District forces, the stoppage is found in the portion of the sewer house connection located in the public street and the stoppage is of such nature that it could not have been cleared by power rodding or snaking, the condition will be corrected by the District or the District's contractor without additional charge to the Owner.

If, however, it is found that the stoppage could have been cleared by power rodding or snaking and is not due to faulty condition (disrepair) of the sewer house connection located within the public street, the Owner will be so informed and shall pay to the District the expense incurred by the District. The bill for such expense shall be paid promptly, and failure to do so shall result in the District taking such action as it deems appropriate.

Where necessary, the District will repair or renew from the main sewer to the street line (property line) any sewer house connection at no cost to the Owner.

It is to be understood that maintenance of the house connection as defined herein is entirely the Owner's responsibility.

#### SEC. S3v SPECIFICATIONS FOR LINING HOUSE CONNECTIONS AND SEWERS

House connections and drain pipe, where approved by the Manager or Chief Engineer, may be lined as a means of repair or rehabilitation by the Property Owner. Lining installation shall be made from a point on private property to a location within 3 feet of the point of connection to the sewer main, with portion located within public right of way paid for by the District. The liner materials, chemical resistance qualities, installation and curing methods shall be in accordance with the liner manufacturer recommendations and the District Standard Project Manual. The Property Owner shall perform a final Closed-Circuit Television (CCTV) inspection to verify proper cure and integrity of the composite liner, and shall provide such CCTV inspection to the District.

drain of The Metropolitan District, has been constructed, repaired or altered or is or has been used, operated or maintained, or that substances are being or recently have been discharged through the same in violation of the requirements of this ordinance, ~~or of~~ the standards established under its provisions or action of the District Board, said Manager shall inquire into the matter. Said Manager may require that the owner, lessee or tenant of the property where such sewer, etc., may be located or of property served by such sewer, etc., assist said Manager and his representatives in such inquiry and permit them to examine such sewer, etc., and observe the manner in which such sewer, etc., is used, operated or maintained and the wastes discharged through the same. If said Manager shall find on such inquiry that there exists good reason to believe that the requirements of this ordinance have not been or are not being complied with, he may require that the owner, lessee or tenant of said property furnish said Manager with adequate proof that said requirements are being conformed to and will continue to be complied with. If it shall appear that said requirements have not been or are not being conformed to or complied with or that good reason exists to believe that they may not thereafter be conformed to or complied with, said Manager may order and require that such owner, lessee or tenant shall immediately take such measures, provide and install such appurtenances or make such changes in such sewer, etc., or the manner of using and maintaining the same as will insure that said requirements will be conformed to or complied with thereafter. All assistance, proof, changes and new appurtenances required by this section to be furnished or provided by the owner, lessee or tenant of property in question shall be promptly furnished by such owner, lessee or tenant without expense to The Metropolitan District.
