

North Hartford - Clean Water Project Update July 25, 2023

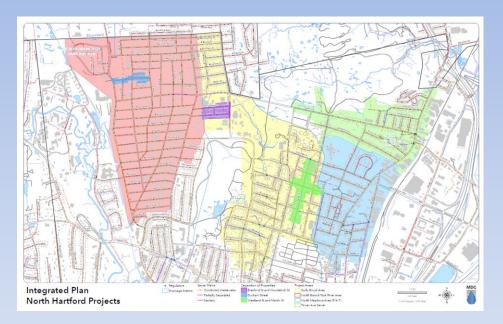

Clean Water Project – Sharing What's New

- MDC has been working closely with CT DEEP to reprioritize Integrated Plan (IP) projects in response to public concerns regarding sewer back ups and flooding in North Hartford
- MDC is setting a new standard with EPA and CT DEEP to revise the approach to Clean Water Act compliance by focusing on existing public and private property infrastructure as a means for CSO reduction. This approach achieves Compliance by first removing stormwater from the sewer system at the source rather building additional capacity to collect the overflows.
- This approach results in adding or advancing the schedule of more than \$150M worth of work in North Hartford

North Hartford Projects - Overview

*This graphic is provided as a handout and on display

North Hartford Projects Added to IP Phase 1 (2023-2029)

- Backwater Valve and Private Property Disconnect 2023-2026 (North Hartford -1,000 – 1,500 properties)
- Sewer & Lateral Rehabilitation in North Hartford: 2023 – 2026 (Red/Yellow/Cyan)
- North Meadows Sewer & Lateral Rehabilitation: 2023 (Green)
- Expedited Sewer Separation Contracts: Specific Streets 2023-2025 (small Hatching)
- Granby Area Sewer Separation (Within Reddish Area)
 2026-2028
- Granby Area Private Separation: (Within Reddish Area) 2028-2030

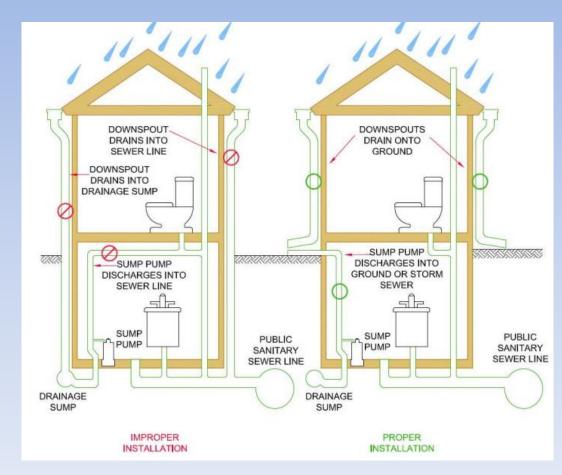

North Hartford Projects On-going in IP Phase 1 (2023-2029)

- North Branch PR Drainage Study/Separation Design (COH/MDC Project): 2023 – 2024
- District wide Backwater valve and Private Property Disconnect

North Hartford Private Property Work

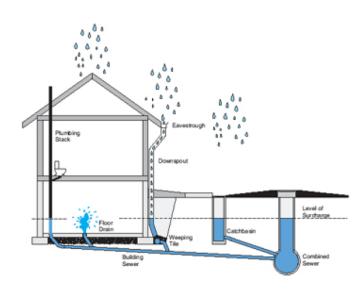

North Hartford Backwater Valve Program and Private Property Inflow Disconnections - \$12.2M

- 1,000 to 1,500 Properties in North Hartford
- Protect Basements plumbing deficiencies and unprotected fixtures
- Laterals (Sewer house connection)
 assess and correct problems
- Private Property Separation changes in anticipation of future combined sewer separation
- Assessments at Private Properties: How to get your appointment with MDC's Utility Services

Combined Sewer Systems

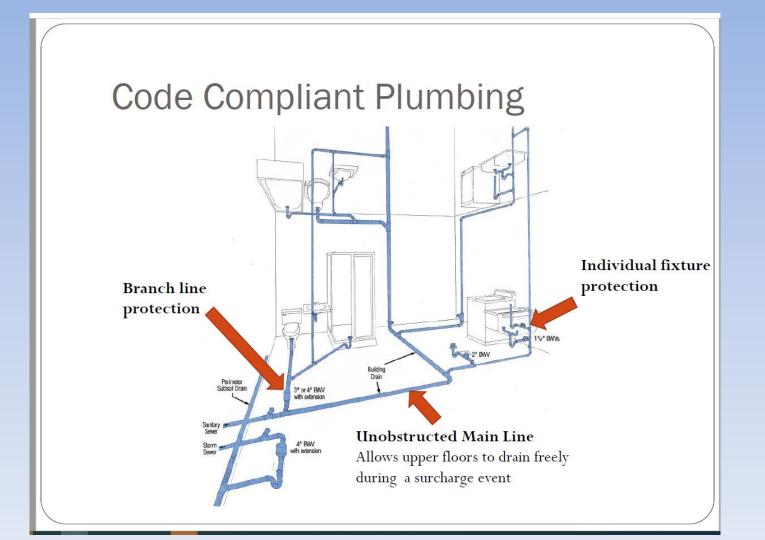

(Hartford)

Combined Sewer Systems are piping systems that share one pipe for both storm and sanitary sewer flows. Combined sewer systems are common in older cities constructed prior to the Clean Water Act of 1972. Combined systems are typically supplemented with regulated overflows to relieve the sewer during heavy rain events. MDC has been actively working over the past two decades to reduce the occurrences and volume of overflows through its Clean Water Project.

Why don't Sewer Backups occur during every storm?

Combined systems are typically designed to handle small to moderate storm events and are also supplemented by the regulated overflows to prevent the sewers from exceeding their capacity. In areas of combined system community that do have separate storm and sewer pipes, backups can still occur as flow from other nonseparated areas flow through the separated area causing the capacity of the pipe to be exceeded.

Things to Know

- Private Property work (Backwater valve, lateral rehab, etc.) performed at no cost to the property owner
- Typical Process for Backwater valve and plumbing work:
 - Assessment, Determination of action, Homeowner acceptance,, City permit, Construction and Inspection
- Pavement/Sidewalk/Lawn Restoration Temporary, with Permanent to follow
- Construction can be inconvenient and cause noise, smell and traffic disruption
- Project work may impact on-street parking, sidewalks, driveways, trees, lawns
- Outreach staff— available to answer questions and help resolve issues

Minority Contractor and Workforce Engagement

- Procurement Outreach to Local Small, Minority, Contractors
 - Partnering with State DAS and Minority Construction Council (MCC) to find available local small, minority, and woman owned contractors
 - Reached out to over 30 local small, minority businesses through DAS and City of Hartford approved contractor lists
 - Back Water Valve and House Connection RFQs are Set-Aside 100% for Small, Minority, and Women-Owned Contractors
 - Larger street projects have subcontractor set-asides for Minority and Women-Owned businesses
- Hartford Residency Workforce Development and Contract Goal of 30%
 - Matching prime and subcontractors with local workforce through Connecticut Pre-Apprenticeship Program (Jeff Cathcart and Shari Pratt)
 - Work-based Learning Program through CT Technical Education and Career System (AI Prince Tech, EC Goodwin, Howell Cheney Tech)
 - Greater Hartford African American Alliance and MCC collaboration

Ways We Communicate

- How to Stay informed:
 - Flyers: via mail or hand delivered
 - Meetings: Project/Neighborhood focused
 - Website:
 - <u>https://themdc.org/projectoutreach/</u>
 - Traffic Alert site
 - Outreach Team
- MDC staff and Contractors may visit you at your property.
 - No Badge No Entry- Ask for ID
