OPEB TRUST INVESTMENT ADVISOR

To: Personnel, Pension & Insurance Committee

July 7, 2020

Dahab Associates Inc. is currently the investment advisor for the District's pension fund. In November 2019, the Board of Finance recommended to the District Board commencing a ten (10) year prefunding phase-in of the District's OPEB Trust be included in the 2020 budget. With funding of the OPEB Trust, it is advisable to retain an investment advisor for the trust. Staff recommends that the existing contract for Dahab Associates Inc. be amended to include investment consulting services for the OPEB Trust in addition to the pension fund. Dahab Associates Inc. provided a quote for additional services at a cost of \$2,000 per year.

It is hereby RECOMMENDED that it be:

Resolved:

That the Chief Executive Office of The Metropolitan District be authorized to amend the existing contract with the firm of Dahab Associates Inc., to add investment consulting services for the District's OPEB Trust.

Respectfully submitted,

Scott W. Jellison Chief Executive Officer

Metropolitan District Pension Plan

Performance Review March 2020

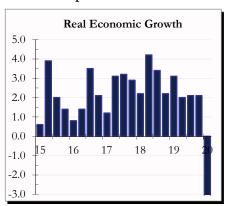

ECONOMIC ENVIRONMENT

End of an Era

The COVID-19 pandemic has led to economic and social panic that hasn't been seen in the developed world in modern times. People are facing extraordinary circumstances, not only in financial marks but in everyday life. The 11-year expansion that followed the global financial crisis is finally ending. The current containment measures, supply chain disruptions, and financial stress are combining to create demand and supply shocks throughout the global economy.

It must be noted that the situation is fluid. The underlying facts and assumptions of this situation may need to be revisited as the

full impact of the virus becomes clearer. Predictions at this point are based on educated speculation and preliminary data analysis. As more data is released, we will likely see numbers that would have been unthinkable at the start of the year. However, the initial damage is already apparent. Jobless claims have

exploded, unemployment has increased, and bankruptcy claims have started to rise. Gross domestic product (GDP) decreased by 4.8% in the first quarter of 2020. The mean Wall Street full-year forecast for GDP is -4.0%.

Central bankers and politicians around the globe have responded meaningfully to the sharp projected downturn. In the United States, the Federal Reserve took bold steps, cutting rates for the first time since 2008. The current US federal funds rate now stands at 0-0.25%. The Fed also implemented a bond-buying program (that could be called, unofficially, QE4) to inject liquidity into the

market. Over the last few weeks, the Federal Reserve has been purchasing \$75 billion of Treasury securities and \$50 billion of agency MBS securities daily. At this pace, it will take less than two weeks for the Fed to purchase more securities than it did during the entirety of the 8-month QE2 program. The size of this new program was initially announced as \$700 billion, but just a week later was expanded to purchases "as needed" to support market liquidity. This stance is unusually loose, which shows the Federal Reserve will do whatever is needed to support markets. US Federal Reserve Chairman Jerome Powell stated the institution is "not going to run out of ammunition."

In March, Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act, a \$2.2 trillion package offering economic stabilization funds for businesses, states, municipalities, and families. This package is staggering when compared to the total federal spending in 2019 of \$4.5 trillion.

The European Central Bank announced the Pandemic Emergency Purchase Program (PEPP). The PEPP is a €750 billion bondbuying program, which added needed liquidity to the market and removed maximums on individual member state's debt. Central Bank President Christine Lagard has stated that there are "no limits" to the central bank's commitment to Union member's economies. In addition to the central bank's actions, governments across Europe have announced similar spending packages to those in the United States. These spending programs are supposed to help households and businesses plug their income gap during this period of disruption.

Many emerging markets are also taking monetary and fiscal actions. India, Chile, and Peru have significantly cut rates. South Africa has started a quantitative-easing program and Brazil is considering the same. China has not made many changes. The 20 basis point cut to China's policy rate and the lowering of reserve requirements, were token actions compared to other countries.

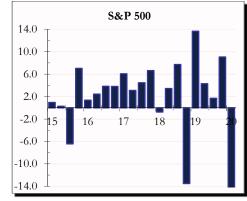

Adding to financial market stress, Saudi Arabia initiated an oil price war with Russia over proposed oil production cuts. Saudi Arabia is attempting to punish Russia for its unwillingness to curtail production. The announcement preceded a fall in oil prices, with Brent crude falling by more than 30%. This was the largest drop since the Gulf War. Over the Easter weekend, an agreement has been made to reduce oil output. Oil prices are still down more than 50%.

DOMESTIC EQUITIES

Volatility Rises

In the first quarter, US markets suffered severe declines and extreme daily swings in prices on a scale comparable to the crises

of 2008 and 2011. The stock market tripped its "circuit breakers" on multiple occasions. This was the first time that the switches were triggered since they were overhauled more than ten years ago. It was only the second time that they have been triggered since 1997.

As the rate of COVID-19

infection accelerated, so did the market's reaction. US stocks entered into a bear market at one of the quickest paces we have seen. Index levels plunged from an all-time high on February 19th into a bear market only 16 days later. For historical context, the Global Financial Crisis and Dot-Com drawdowns took six months and one year, respectively.

The selling pressure was widespread and indiscriminate. Core domestic equity benchmarks were down between 14%-36%. Small-

caps fell more than their large-cap counterparts. Some of this is attributable to the higher weighting of energy and financials within the small cap benchmark.

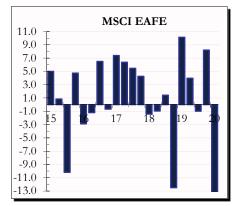

Growth outperformed value across all market capitalizations and in every region of the world. This divergence was due to the value indices substantial weighting towards financials and energy companies. The Russell 3000 Value has 23.4% more allocated to financial sector and 6.6% more allocated to the energy sector compared to the Russell 3000 Growth. These two sectors alone accounted for 93% of value's return deficit. As of March 31st, the large cap growth equities posted the only positive return (0.8%) over the trailing 12 months of any equity benchmark.

INTERNATIONAL EQUITIES

Global Shock

International stocks declined more than US stocks. The MSCI EAFE index returned -22.7%, while the MSCI Emerging Markets index returned -23.6%. A strengthening US dollar acted as a further headwind.

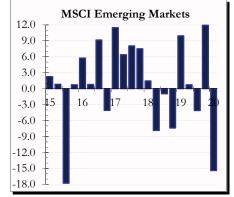

International developed markets, with the MSCI EAFE as a proxy, suffered losses in all 21 countries that comprise the index. Notably, Japanese equities made up the most significant percentage of the index (26.3%) and suffered the least (return of -16.6%). Japan has thus far been on a different virus trajectory then

most other developed nations. COVID-19 has thus far had a slower spread and lower mortality rate than in other developed countries.

Three of the top countries by weight in the index sustained losses in excess of the index. The United Kingdom, France, and Germany all lost more than 26% of their value, and comprised nearly 35% of the weight in the index.

As with developed markets, all 26 emerging-market countries saw losses in the first quarter. Most EM countries were down considerably, with some down more than -30%. China was provided a little ballast as it only lost 10%, and it comprises 30% of the index.

Brazil was the weakest country in the emerging markets index.

The country's two largest sectors (financials and energy) lost more than 50%.

BOND MARKET

Quality Wins the Day

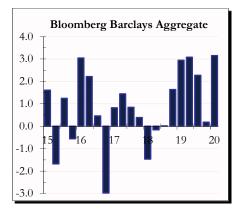

There was wide discrepancy in the returns of fixed-income benchmarks in Q1. Issuances with higher quality and longer duration performed best. Spreads widened due to a flight to quality and increased volatility caused by COVID-19 concerns.

Liquidity in the bond market was weak, showing signs of stress. Many fixed-income managers were having a hard time finding buyers in both high- and low-quality issues. However, it should be noted that these liquidity pressures have lessened by central bank bond-buying programs.

High yield and leveraged loans, the lowest quality benchmarks we track, were down -12.7% and -13.0%, respectively. This performance was due to their allocation to finance, energy and

financial companies, the three sectors most susceptible from COVID-19 and oil price declines.

Even with the historically high volatility in the market, corporate issuers were opportunistic and issued \$272 billion in bonds in March alone. Many corporations have stated that they are using the

opportunity to increase the amount of working capital on their balance sheets. However, some industries are issuing debt to increase the chances of survival in a stressful economic time.

CASH EQUIVALENTS

Low and Lower

The three-month T-Bill returned 0.5% for the 1st quarter. Future returns for cash equivalents seem dim, with the Fed Funds rate at 0-0.25%. The 3-month LIBOR spiked as commercial paper issuers had challenges rolling their maturities. The implied inflation expectation from the 10-year TIPS breakeven inflation rate was notably lower in the quarter, settling below 1%.

APPENDIX - DISCLOSURES

* The Policy Index is a policy-weighted passive index that was constructed as follows:

40% S&P 500 10% Russell 2000 10% MSCI EAFE

29% Ryan Labs 5-year GIC Index 11% Bloomberg Barclays Global Government

The Blended Growth Assumption Rate reflects an assumed growth rate of 7.50% for all periods through December, 2014 and then a rate of 7.25% for all periods thereafter.

* The shadow index is a customized index that matches your portfolio's asset allocation on a quarterly basis.

This index was calculated using the following asset classes and corresponding benchmarks:

INVESTMENT RETURN

On March 31st, 2020, the Metropolitan District Pension Plan's AQR Capital Management US Defensive Equity portfolio was valued at \$17,268,432, a decrease of \$3,492,596 from the December ending value of \$20,761,028. Last quarter, the account recorded total net contributions of \$2,000,000, which partially offset the account's \$5,492,596 net investment loss for the period. Because there were no income receipts during the first quarter, the portfolio's net investment losses were entirely made up of capital losses (realized and unrealized).

RELATIVE PERFORMANCE

Total Fund

During the first quarter, the AQR Capital Management US Defensive Equity portfolio declined by 18.6%, which was 1.6% greater than the Russell 1000 Index's return of -20.2% and ranked in the 27th percentile of the Large Cap Core universe.

EOUITY ANALYSIS

This portfolio utilized all eleven industry groups included in our analysis. Relative to the Russell 2000, the portfolio was most notably overweight in the Consumer Discretionary, Materials and Real Estate sectors. In contrast, the portfolio's Industrials and Utilities sectors were most underweight.

Despite some success in the Health Care and Utilities sectors, the portfolio as a whole declined by slightly more than the Russell 2000 last quarter. Performance in the Communication Services, Energy and Industrials sectors were notably below the benchmark. Despite the nominal severity of this portfolio's decline, performance was generally in line with portfolios of a similar mandate.

INVESTMENT RETURN

On March 31st, 2020, the Metropolitan District Pension Plan's Hardman Johnston portfolio was valued at \$14,559,973, a decrease of \$3,985,482 from the December ending value of \$18,545,455. Last quarter, the account recorded total net withdrawals of \$32,162 in addition to \$3,953,320 in net investment losses. Because there were no income receipts during the first quarter, the portfolio's net investment losses were entirely made up of capital losses (realized and unrealized).

RELATIVE PERFORMANCE

Total Fund

During the first quarter, the Hardman Johnston portfolio declined by 21.3%, which was 1.4% greater than the MSCI EAFE Index's return of -22.7% and ranked in the 28th percentile of the International Equity universe. Over the trailing twelve-month period, this portfolio returned -8.5%, which was 5.4% above the benchmark's -13.9% return, and ranked in the 18th percentile. Since September 2018, the portfolio returned -4.4% per annum and ranked in the 11th percentile. For comparison, the MSCI EAFE Index returned an annualized -11.7% over the same period.

INVESTMENT RETURN

This account was funded with an initial contribution of \$85,570 in September 2015. However, a material portion of the committed capital was not allocated until April 2016. Performance for those initial months, based on a relatively minor balance, would be non-meaningful to report, and could potentially distort cumulative returns going forward. For this reason, we have moved the performance start date to March 31, 2016. All data and effects from prior to that date are still captured by the composite portfolio.

On March 31st, 2020, the Metropolitan District Pension Plan's Forest Investment Associates FIA Timber Growth & Value Partners, LP portfolio was valued at \$9,625,439, representing an increase of \$234,766 from the December quarter's ending value of \$9,390,673. Last quarter, the Fund posted withdrawals totaling \$22,625 (a manager fee distribution), which partially offset the portfolio's net investment return of \$257,391. Since there were no income receipts for the first quarter, the portfolio's net investment return figure was the product of net realized and unrealized capital gains totaling \$257,391.

RELATIVE PERFORMANCE

Total Fund

During the first quarter, the Forest Investment Associates FIA Timber Growth & Value Partners, LP account returned 2.7%, which was 2.6% above the NCREIF Timber Index's return of 0.1%. Over the trailing year, the portfolio returned -5.3%, which was 6.6% below the benchmark's 1.3% return. Since March 2016, the Forest Investment Associates FIA Timber Growth & Value Partners, LP portfolio returned 4.1% per annum, while the NCREIF Timber Index returned an annualized 2.8% over the same time frame.
