

CONSTRUCTION NOTICE

SEWER SEPARATION WORK TO BEGIN

(Durham Street - Hartford)

Beginning in mid-September, the Metropolitan District (MDC) and their contractor, VMS Construction, will be starting sewer separation work following the completion of the water main installation project.

Over the next couple of weeks, MDC's subcontractor, Martinez, Couch & Associates (MCA) will continue conducting external property assessments. These activities include, taking measurements and photos to document existing stormwater connections to our sewer system. MCA staff will need to work on and around properties to collect the data and do not need to enter your premises for any of this work. This data is necessary for the sewer separation project design to redirect the stormwater.

Sewer separation work will include open dig construction in Durham Street to separate the current "combined" sewer system. This work will include installing a new dedicated pipe in the road for stormwater, a new stormwater pipe to each property, and rehabilitation (no-dig) of existing sewer pipes in the street and to each building. All of this work is done at no cost to the property owner. Work will also include basement assessments to install protective devices on subsurface (basement) fixtures to prevent sewer back-ups.

Our Outreach Team will be door knocking in the coming weeks to introduce themselves, answer questions and gather contact information to ensure we keep you informed throughout the duration of our work.

Work hours will be Monday through Friday, between 7:00am and 5:00pm.

Schedules are subject to change based on weather or unforeseen construction related activities. All MDC Staff, Contractors and Consultants must be properly identified and present ID upon request.

If you have questions or concerns, please contact:
